

### Virtual Instant Challenge - Elementary Level Cumulative\* Super Site\*\*

\*Cumulative scores were determined by adding up each team's scores from Weeks 1, 2, and 3 of the Virtual Instant Challenge portion of Global Finals 2020.

\*\*This Super Site was composed of the top 5 teams from each Elementary Level Split Site to determine the top overall Elementary Level winners. A different Appraisal Team was used to determine the scores in the Super Site.

Rank	Registration Number	Team Name	Location	Total Score
1	900-29876	The Two Tenors	CA	208.50

### Virtual Instant Challenge - Middle Level Cumulative\* Super Site\*\*

\*Cumulative scores were determined by adding up each team's scores from Weeks 1, 2, and 3 of the Virtual Instant Challenge portion of Global Finals 2020.

\*\*This Super Site was composed of the top 5 teams from each Middle Level Split Site to determine the top overall Middle Level winners. A different Appraisal Team was used to determine the scores in the Super Site.

### Virtual Instant Challenge - Secondary Level Cumulative\* Super Site\*\*

\*Cumulative scores were determined by adding up each team's scores from Weeks 1, 2, and 3 of the Virtual Instant Challenge portion of Global Finals 2020.

\*\*This Super Site was composed of the top 5 teams from each Secondary Level Split Site to determine the top overall Secondary Level winners. A different Appraisal Team was used to determine the scores in the Super Site.

### Virtual Instant Challenge - Secondary Level Cumulative\* Super Site\*\*

\*Cumulative scores were determined by adding up each team's scores from Weeks 1, 2, and 3 of the Virtual Instant Challenge portion of Global Finals 2020.

\*\*This Super Site was composed of the top 5 teams from each Secondary Level Split Site to determine the top overall Secondary Level winners. A different Appraisal Team was used to determine the scores in the Super Site.

Rank	Registration Number	Team Name	Location	Total Score

## Virtual Team Challenge Special Awards

Award	Registration Number	Competition Level	Team Name	Location
Renaissance	900-14244	Elementary	Smidge of a Bridge	TX
<p>This team created detailed and specific backgrounds for each of their video windows that really set the scene for each of the characters in each of their unique settings. The detail made the Appraisal Team feel like we were viewing them in mission control, in a spacecraft, in a doctor's office, and in a vehicle. The team included every little detail possible. It must have been very time consuming, and it was done in a skillful way by a truly talented team. The Appraisal Team just loved it!</p>				

Renaissance	900-29876	Elementary	The Two Tenors	CA
<p>The Appraisers were absolutely in awe of this dynamic duo's ingenuity! As our two TV show hosts sought out the Avengers to help calm this COVID-crisis, none of us expected to actually witness these vigilante heroes saving the day. Using stop-motion animation, these Lego hero characters each performed on-screen with complex, life-like movement, spoke with charismatic and distinct voice-overs, all layered with squabbling dialogue to discuss (and bicker) about how to achieve the goal. This team took a unique approach to solving this challenge by incorporating extensive video animation and adding a multitude of spirited characters, bravely showing us that it's not about the size of the team, but the creativity that's accomplished between them.</p>				

Renaissance	900-26433	Middle	Tie DI-ed Tic Tacs	CA
<p>Intricate chalk drawings formed the backdrop of a village and a forest, and also seamlessly united each of the participant windows to give the impression they were all in the same place; I was very impressed with the attention to detail and the skill demonstrated in each of the drawings, as well as the way they made the windows work for them; They also made the windows work for them when they portrayed the dragon with head, tail, and two wings, one in each window.</p>				

Renaissance	900-94854	Middle	Gigantic Teddybears	CA
<p>With a Fortune Teller setting the stage, this team of unique personalities uses puns and song to tell a story of characters in a virtual world collaborating with those in a real world to find cures for their respective "virus". Through their digitally drawn backgrounds, flipping like blinds through the use of a battery powered motor, the audience joins the virtual characters as they get transported to the real world. Using audio glitches, spoon levers, and phone vibration-powered movements, the audience is then taken inside this team's Collaborative Art Rube Goldberg piece by following a "computer code" marble moving seamlessly through each of 6 different windows analyzing and combining data to make "the connection" to find the cures. Finally, the marble run's shape of a heart reinforces the team's message that everything can be accomplished if we work together.</p>				

Renaissance	900-82596	Secondary	COV-DI 19	WA
<p>The Appraisers were amazed by this team's original musical composition! We were so impressed with how each team member contributed in multiple ways to the final composition. Using both traditional and found instruments, the team built to a crescendo that was both moving and musically delightful!!</p>				

### Virtual Instant Challenge Week 1 Special Awards

Award	Registration Number	Competition Level	Team Name	Location
Davinci	900-42555	Elementary	Eagle Team	CHINA
This team showed great creativity, teamwork, and ingenuity by using the new social distancing platform to create their statue poses. By using different team member body parts for each part of the statue, they showed the creative way that this platform can be used.				

Renaissance	900-09350	Secondary	A.I.M.	CA
This team gave an outstanding performance that had the Appraisal Team belly laughing the entire time! The team presented a murder mystery solved by antropomorphized senses. It was a delight to watch!				

Renaissance	900-13795	Secondary	The Golden Trio	WA
This team gave an amazing performance that ventured into a genre rarely explored in Instant Challenge - horror. The story the team told actually gave the Appraisal Team chills. The storytelling combined with the team's creative use of the video conferencing platform made this solution absolutely brilliant.				

### Virtual Instant Challenge Week 2 Special Awards

Award	Registration Number	Competition Level	Team Name	Location
Davinci	900-80654	Secondary	DI STEMCELLS	CA
The creative use of virtual meeting technology to create a larger than life crab and an iCloud character made the Appraisal Team chuckle. We were in awe of this team's solution - it really made the best of the virtual platform!				

### Virtual Instant Challenge Week 3 Special Awards

Award	Registration Number	Competition Level	Team Name	Location
Davinci	900-06012	Middle	Phantom of the PROPera	WA
This team took a unique approach to their Instant Challenge by implanting the team's chosen name to create a mystery for their team to solve throughout their performance. The team creatively implemented jokes and a flashback to effectively show the Appraisers what was happening while the team was trying to solve the mystery. By deciphering intentional misspelling of French words, the team was able to find out why the chosen name was spelled wrong, and why one of their team members went missing. It was an ingenious solution!				

Renaissance	900-80654	Secondary	DI STEMCELLS	CA
<p>This team demonstrated an extraordinary and unique approach to their extra-special performance by using hands and arms to represent bird wings, feathers, and feet. They used the "socially distant" video format as an asset instead of a liability. The Appraisal Team was awed by the way this team took the Challenge to a whole new level. This performance was truly creative and transformational!</p>				

<b>Team Challenge Showcase - Technical Challenge Special Awards</b>				
<b>Award</b>	<b>Registration Number</b>	<b>Competition Level</b>	<b>Team Name</b>	<b>Location</b>
Davinci	900-88200	Secondary	Jinxed Jicamas	CA
<p>This team brought the whole package! This team attempted to tackle climate change and cardboard waste by creating an EcoBox that used a team-created app to increase efficiency and security in shipping, while also reducing waste. Not only was this Presentation well scripted and performed (and funny as well), the team showed us a unique approach to a real-world problem that could provide an actual solution. The creativity of the props and use of staging was absolutely DI-lightful!</p>				

Renaissance	900-04046	Secondary	The Timekeepers	TX
<p>Between having the entire performance done as a Limerick, excellent design and technology on the Invention, and a mesmerizing stop-motion film, this team showed amazing skill. The engineering methods were used with such precision, and the level of detail for each method went well beyond just aesthetics. The transformation from a mechanical world to a natural world was beautifully done. This was a Presentation the Appraisal Team will never forget!</p>				

<b>Team Challenge Showcase - Scientific Challenge Special Awards</b>				
<b>Award</b>	<b>Registration Number</b>	<b>Competition Level</b>	<b>Team Name</b>	<b>Location</b>
Renaissance	900-58898	Middle	5 Minute Climate Champions	WI
<p>The design and execution of the pangolin costume was outstanding. The choice of material and overlapping scales gave the pangolin an authentic look which really brought the creature to life.</p>				

Renaissance	900-30869	Middle	Undercover Goldfish	CO
<p>This team actually combined and modified many electrical and mechanical components to bring their concept to reality in the Habitat Morph. All electrical components were modified to be battery powered. In addition, the viper costume was a showstopper! It included 4447 Pop tabs and 2633 zip ties and took 3 months to complete. Great observation of detail to the species costume!</p>				

Renaissance	900-69587	Secondary	Legendary Apple Doom Skullz	TX
<p>The design of an awesome, gigantic snail with coordinated lighting demonstrated outstanding skill in design, performance, and execution. The performance was smooth and teamwork was evident, making the whole Presentation a joy to watch.</p>				

Renaissance	900-09352	Secondary	DI is Not a Victimless Crime	CO
<p>This team combined engineering, advanced technology and puppets to create a jaw-dropping and innovative Presentation, in which the team members fit on a large face and used tiny mite puppets to create a unique perspective. It was clear that the team problem solved every detail of the Presentation. The Appraisers couldn't help but laugh out loud!</p>				

<b>Team Challenge Showcase - Fine Arts Challenge Special Awards</b>				
<b>Award</b>	<b>Registration Number</b>	<b>Competition Level</b>	<b>Team Name</b>	<b>Location</b>
Renaissance	900-13988	Middle	Help! We're Stuck in a Screen!	TX
<p>From this team's choreography, especially zipping up their jackets and their 1940's dance, to their clever rap about changing the "plane" of focus, to the ease of the scenery change from kitchen to airplane, this team's Presentation was outstanding! The execution of the "screen swipe" choreography at the end was particularly impactful! The Appraisers loved this team's use of color scheme and hair design to bring the story to life. It was obvious that this team took great joy in working together.</p>				

Renaissance	900-77015	Middle	Monster Busters	CHINA
<p>This team created amazingly detailed costumes and backgrounds. The Appraisers were particularly awed by the intricacy of one costume, which involved a spinning wheel. The stunning backgrounds were structured like a book that turned its own pages to help move the plot along.</p>				

Renaissance	900-93475	Secondary	D.I. Janes	TX
<p>This team truly demonstrated outstanding skill in design and execution. Their Empire State Building, made with thousands of sesame seeds, was so authentic. The two sizes of the King Kong balloon were well made and identical in all but size. This in combination with the team's brilliant use of the Photographic Technique, led to a perfect change of scale from ground level to the top of the Empire State Building. In addition, the team built a paper mache Godzilla that was so realistic it almost leapt off the screen. The Appraisal Team was truly blown away by the excellence of this team's work.</p>				

Renaissance	900-35007	Secondary	6 Glorbs with 2 Brain Cells	IL
<p>This team went above and beyond with their outstanding design and engineering. They created a two-story set with collapsible siding, electromagnetic letters, a collapsing second floor, a pneumatic ceiling fan device, a door-ladder, a working jukebox, and a realistic representation of a blazing fire. The variety and sophistication of the technology and engineering that went into this solution was remarkable and truly made the story come to life.</p>				

### Team Challenge Showcase - Engineering Challenge Special Awards

Award	Registration Number	Competition Level	Team Name	Location
Davinci	900-96920	Secondary	Millishoba	MA
<p>Every piece of this team's solution was incredibly well thought-out, beautifully designed, and masterfully engineered, from the realistic working alligator, to their rain machine, to their dazzling winged costume, and their lush everglades. This team really took their solution to the next level, and the Appraisal Team was thoroughly impressed with their solution.</p>				

### Team Challenge Showcase - Service Learning Challenge Special Awards

Award	Registration Number	Competition Level	Team Name	Location
Renaissance	900-39463	Elementary	Struck By Creativity	MN
<p>This team's backdrops, costumes and hand-created animals showed exceptional effort and design. Their creative use of materials in multiple solution elements was especially impressive. All aspects of the team's Presentation, including the team's Project information, were integrated beautifully to showcase an outstanding Presentation.</p>				

Renaissance	900-02199	Middle	The b Bunch	OH
<p>Bee-tween their adorable hovering bees and their inflatable vegetables, this team used simple, but elegant technical methods in their Presentation. The Appraisers were abuzz with excitement over this team's Milestone Marker.</p>				

Renaissance	900-45166	Secondary	the crew	TX
<p>This team displayed tremendous courage by presenting a serious subject without the emotional relief of a happy-ever-after ending. In taking on the issue of thyroid cancer and spreading awareness about the accessibility of thyroid guards, this team showcased their willingness to take risks as well as their artistry in conveying a serious subject in a beautiful way. The Appraisers were moved to tears.</p>
