EARLY LEARNING

FOSTER CURIOSITY, COURAGE AND CREATIVITY

WHAT IS DESTINATION IMAGINATION?

Destination Imagination (DI) is an educational nonprofit that prepares students of all ages for a future that is rapidly evolving. We do this through a project-based learning experience that applies the creative process across seven different Challenge types - Early Learning, Technical, Scientific, Engineering, Fine Arts, Improvisational, and Service Learning. Through the Destination Imagination Challenge Experience, children gain confidence in vital 21st century skills including:

- Social & Emotional Learning Competencies
- Creative & Critical Thinking
- Team Building
- Project Management

EARLY LEARNING CHALLENGE: RISING STARS

Our non-competitive Early Learning Challenge, Rising Stars, is designed for 3-6 year olds. In a play-based environment, students are encouraged to be creative, learn simple building and construction, become comfortable working in teams, and practice speaking in front of an audience.

STEM & LITERACY PATHWAYS

Early learners are naturally curious and can adapt well to new STEAM (Science, Technology, Engineering, Arts, and Mathematics) concepts. That’s why Destination Imagination created STEM & Literacy Pathways for Early Learners. This resource provides educators with tools to meaningfully engage students with activities, transitions, and feedback loop questions that can be linked to the fulfillment of many key Common Core domains.

Pathways is available for $199.00 per classroom. To learn more about Destination Imagination’s Early Learning offerings, please contact AskDI@dihq.org or call 1.888.321.1503.
